Does Train Size Really Matter?

Douglas Attaway
LNG Technology Manager – Global LNG Technology and Development
KBR
Is Bigger Always Better?

Sometimes, yes…
Is Bigger Always Better?

 Depends on your needs…
Big is Beautiful – Economies of Scale?

Onshore Train Size Growth - Past, Present and Future

![Graph showing onshore train size growth with data points for existing and committed trains and future prospects.](#)
Issues to Consider

• Liquefaction Process Technology Selection
• Construction and Modularization
• Sacrificing CAPEX for OPEX
• Safety (e.g. Simultaneous Operations, SIMOPS)
• Operational Flexibility and Maintenance
• LNG Sales and Marketing (Commercial)
