

SPONSOR AND EXHIBITOR OPPORTUNITIES

2026

CH CONNECTIONS
THE METHANE EMISSIONS
CONFERENCE

GTI ENERGY

September 15-16, 2026 Colorado State University, Fort Collins, CO

GTI ENERGY

CH4 Connections, the Methane Emissions Conference, is the premier convening platform for stakeholders shaping methane emissions measurement and mitigation strategies. Hosted by GTI Energy in partnership with Colorado State University's Energy Institute, the conference brings decision makers, technology innovators, and researchers together in Fort Collins, Colorado to drive real-world impact across the energy value chain.

Over the past 13 years, CH4 Connections has engaged thousands of operators, solution providers, policymakers, and researchers, making it a trusted forum where trends are emerging, and solutions meet operational reality. Sponsors play a central role in these conversations, gaining direct access to the forum, organizations, and individuals advancing methane emissions measurement and reduction at scale.

Join us on **September 15–16, 2026**, for focused, high value discussions centered on this year's theme: ***Sustaining Impact: Mitigating Methane Emissions Amidst Opportunity and Change.***

Expanded programming includes **Veritas Methane Measurement and Verification updates on Sept. 14, CSU METEC's Pipeline Leak Detection and Solution Showcase on Sept. 17th**, and **poster sessions featuring applied research and case studies during the conference**, creating multiple touchpoints for sponsors to demonstrate leadership, showcase solutions, and engage directly with a technical audience.

Whether this is your first-year sponsoring or your 13th, CH4 Connections offers a unique opportunity to elevate your company, build trusted relationships, and help shape the next phase of methane emissions discussions. We look forward to welcoming your team to Fort Collins and to partner with you in advancing meaningful, outcomes driven dialogue.

Amanda Harmon

Sr. Director,
Emissions Management,
GTI Energy

Daniel Zimmerle

Director, Methane Emissions
Program, Energy Institute,
Colorado State University
